AN INTERCESSORS FOR AMERICA SPECIAL REPORT

THE BABY RESEARCH FACTORY

The big business of using murdered babies for research material

First, Take Action

CLICK HERE TO SEND A MESSAGE TO YOUR ELECTED OFFICIALS

urging them to stop this barbaric practice from happening. Usually action comes at the end of an article, but we believe just reading the headline will move you to ask for this atrocious practice to end.

Growing babies to kill them

This issue has been brewing for 40 years now. In the 1980s, scientists determined that embryonic stem cells in mice could be used for research. The lure of curing diseases, creating therapies, and understanding genetic abnormalities made scientists cross an ethical line--using human embryonic cells in research. Fast forward to today and we see where the slippery slope has led--just recently ethical standards were again loosened so that scientists can "grow babies" and then kill and harvest them for medical research. Research like fusing animal and human DNA (called chimeras), and also creating 3-parent human embryos--grisly Frankenstein-like research that was even outlawed until just recently. The International Society for Stem Cell Research (ISSCR) headquartered in Illinois is the oversight organization that released the new ethical standards governing research for scientists.

Human life destroyed, debased, discarded.

In response to this recent move, two U.S. Congressmen, **Rep. Chris Smith (R-NJ) and Sen. Mike Braun (R-IN)**, have proposed legislation that prohibits human-chimera research, **HR 3542/S. 1800**. It helps but doesn't solve the larger issue of using the unborn as a factory that fuels abusive research "for the greater good."

 Pray that this and other similar legislation passes to prohibit these types of research.

BY THE NUMBERS

\$12,000

Price paid for each baby between 16-24 wks

600

Pages in report detailing U.S. government participation in buying and selling "fresh" baby parts

\$3,000,000

Sum the NIH paid to Dr. Jorg Gerlach, the PITT scientist who pioneered an organ harvesting technique on babies

Figures provided by <u>CMP</u>, <u>Judicial</u> <u>Watch</u>, and <u>CMP</u>.

Who's Cashing in on the Murder of Babies?

The abortion industry has created a whole empire of profiting from selling aborted babies for medical use. David Daleiden and the <u>Center for Medical Progress</u> exposed the abortion industry's callous and debased wheeling and dealing between Planned Parenthood representatives and purported medical research executives (which were actually Daleiden's undercover journalists). What did the media and scientific community do when this was exposed? They made Daleiden the villain and the state prosecuted David Daleiden and confiscated hours of his undercover video as "evidence." Who charged Daleiden with a crime instead of Planned Parenthood for selling the baby body parts? <u>Kamala Harris</u>, who was California Attorney General at the time.

The barbaric practices continue. It was recently uncovered that the University of Pittsburgh (Pitt), with participation of Planned Parenthood, is conducting experiments that are unfathomable. <u>Scalping</u> 5-month old aborted fetuses to stitch onto lab rats, harvesting and trafficking <u>fetal kidneys</u>, and <u>killing</u> babies <u>delivered</u> alive to <u>harvest</u> their <u>livers</u>. Many of these are taxpayer-funded projects by the National Institutes of Health, and in large part **Dr.**Fauci's NIAID office.

Here's how it works, according to Center for Medical Progress' Daleiden: "Local Planned Parenthood of Western Pennsylvania abortion providers supply the aborted fetuses, while Pitt sponsors the local Planned Parenthood's operations, in what looks like an illegal Quid Pro Quo for fetal body parts, forbidden by 42 U.S. Code 289g-2 and 18 Pennsylvania Statutes 3216. Pennsylvania law also makes it a felony to experiment on a living fetus or to fail to provide immediate medical care to an infant born alive." CMP has released a new video exposing these horrific and illegal practices. A new report details that the FDA has been a robust customer.

Prayer Points:

- Pray that these practices would be exposed and opposed.
- Pray for bold and courageous citizens, lawmakers, officials, and judges to act.
- Pray for a heart change in our nation about abortion, that we as a nation would value life.

Pray for those who are exposing these evils
