

MADE IN TECHNOLOGY'S IMAGE?

The plan to dehumanize the world through technology

What is "transhumanism?"

The [World Transhumanism Association](#) defines it as: "A philosophy that advocates for the use of technology in order to overcome our biological limitations and to transform the human condition. It is part of the natural evolution of the human being, or an extension of humanization."

The Transhumanists declare that humanity will be radically changed by technology. They envision stronger, more athletic humans who can overcome disease, disabilities, and aging. By merging human bodies and brains with artificial intelligence, they foresee a time when eternal life can be achieved.

Fact: Transhumanism began in the 1950's through founder [Julian Huxley](#), an evolutionary biologist from England who said, "God is a hypothesis constructed by man."

The end game seems unreal

- 🌐 To enhance all aspects of the human body and brain (Human 2.0)
- 🌐 To prolong life, even to the point of eternal life
- 🌐 To increase intelligence and thinking power exponentially
- 🌐 To become one with the Internet by merging with the digital realm (also known as the Internet of Bodies)
- 🌐 To fuse mankind with machine, even to the point of becoming cyborgs
- 🌐 To remove all [boundaries](#), even those which [separate](#) male and [female](#)
- 🌐 To create a collective consciousness (hive mind) by connecting humans to "the cloud"

Your turn:

As you are praying, write down any promptings or notes you are hearing from the Holy Spirit.

It's not a movie—the technology is real

This may seem far-fetched to many, but technologies exist today that is being used toward creating technologically-interfaced humans. Below are definitions of the technologies that are critical to the process. Some may seem harmless in and of themselves, but with a nefarious purpose, these scientific processes are dangerous.

Biotechnology—Examples include the manufacture of human insulin and growth hormones, the use of cell and reproductive cloning, genetic modification of plants and animals, genetically altered bacteria, stem cell research and genetic therapies for animals and humans.

Nanotechnology— This includes [nanobots](#) or nanorobots that are injected into the body and have the ability to circulate in the blood, and even penetrate the blood-brain barrier. This paves the way for [neural-interface](#) technologies that allow for human brains to connect/merge with computers.

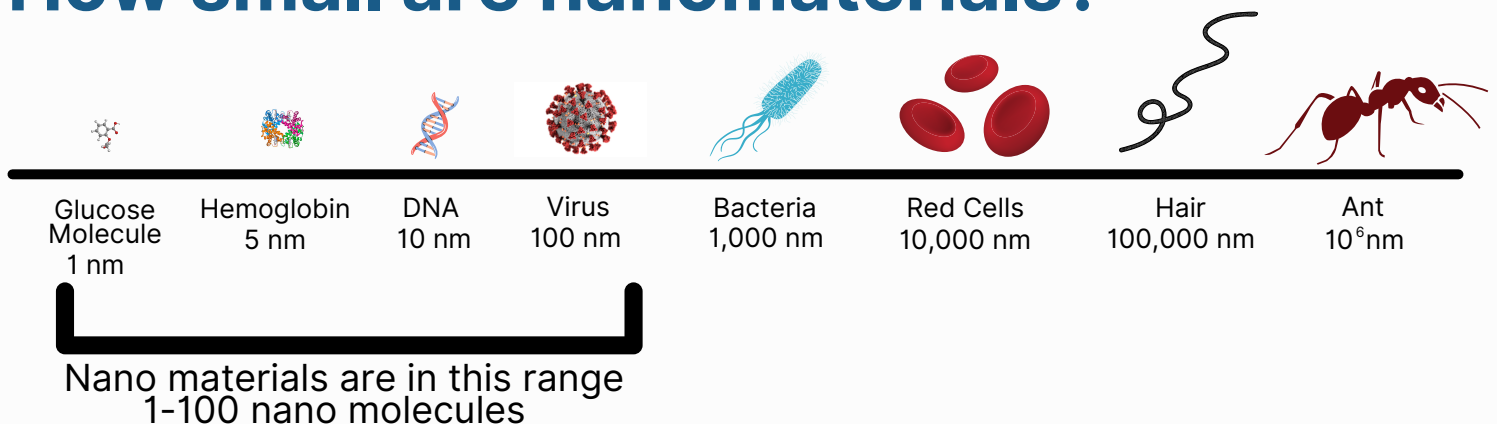

Genetic therapy and engineering— [CRISPR-CAS 9](#) technology is [essential](#) for the slicing and dicing of genes. Genetic engineering would include the [editing](#) of embryos, as well as the use of aborted fetal cell tissue for research. Synthetic gene engineering can lead to the development of new species.

Robotics— Cyborg [technologies](#) such as bionic body parts and prosthetics, as well as wireless implants, are used to create bodies that are both organic and inorganic.

Fact: Nanotechnology: Technology that manipulates the molecular structure of materials (atoms and molecules) in order to alter their natural properties.

A nanometer is an extremely small unit of length—a billionth of a meter. A single human hair is about 80,000 to 100,000 nm wide.

How small are nanomaterials?

You have also heard of nanomaterials recently as part of the Covid vaccine delivery system, mRNA. As outlined in an [article](#) in News Medical, "Nanomaterials have been intrinsic to the development of coronavirus disease 2019 (COVID-19) vaccines, the mRNA-based vaccines utilizing liposomes or lipid nanoparticles as a delivery vehicle. Outside of the cytoplasm, mRNA degrades quickly, and thus liposomes ensure that the payload enters the cell and is available for transcription. An mRNA-based vaccine utilizing liposomes was first developed in 1993 against the influenza virus. Since then, liposomes have been exploited to deliver sensitive biomolecules into the cell in several capacities, such as during CRISPR-Cas9 gene editing." How does this mass nano-delivery system relate to the desires of transhumanists?

Leaders and agencies of transhumanism

RAY KURZWEIL

Engineering Director of Google who co-founded [Singularity University](#). [Kurzweil](#) claims that [humans](#) will become hybrids by the year 2030 and that in the near future, human brains will be [connected](#) directly to the cloud. This will be done via nanobots made from DNA strands.

What is Singularity? This is the point at which artificial intelligence will surpass that of humanity, which will create a convergence of human and machine consciousness.

2045 Initiative- A network of researchers and scientists seeking to extend life through the use of robotics and [brain emulation](#) (which involves mapping the brain, uploading long term memories and transferring them to a computer, robot, or even a new species). On the [website](#), a roadmap is provided for developing cybernetic immortality.

“When you talk to a human in 2035, you’ll be talking to someone that’s a combination of biological and non-biological intelligence.”

-Ray Kurzweil

CRAIG VENTER

Biotechnologist and geneticist who founded [Celera Genomics](#) and the J. Craig Venter Institute. [Mapped](#) the human genome and created an entirely [synthetic](#) bacterium named “Synthia.” Wants to crack the genetic code of every creature on the planet and even [patent](#) synthetic [genomes](#).

“Life is basically the result of an information process, starting with information on a computer—we can put it in a recipient cell and create a new species.”

-Craig Venter

ELON MUSK

Project architect of Tesla, founder of SpaceX, and [Open AI](#). Envisions our brains being linked to computers and mobile [devices](#). Has invested in [Neuralink](#), which develops implantable brain interfaces. Believes mRNA technology will create monumental breakthroughs such as halting the aging process. Has also issued [warnings](#) about AI becoming “god-like.”

“AI will be the best or worst thing ever for humanity.”

-Elon Musk

KLAUS SCHWAB

Founder and [Executive](#) Chairman of the World Economic Forum. In his [book](#), [The Fourth Industrial Revolution](#), he states that the time is coming where we must merge our physical, [digital](#) and biological [identities](#). He advocates for a [Great Reset](#) of capitalism, which would embrace [digital ID](#)'s and [global monitoring](#) through AI.

“The Fourth Industrial Revolution, finally, will change not only what we do but also who we are. It will affect our identity and all the issues associated with it: our sense of privacy, our notions of ownership, our consumption patterns... It is already changing our health and leading to a ‘quantified’ self, and sooner than we think it may lead to human augmentation.”

-Klaus Schwab

DARPA

(Defense Advanced [Research](#) Projects Agency)—A branch of the U.S. Department of Defense which creates and executes research and development projects that push the limits in technology and science. Some projects include designing [super-soldiers](#), telepathic brain interfaces, robotic animals, and [biosensors](#) that can detect viruses like the [flu](#) and Covid-19.

Transhumanist Platforms

Metaverse by Facebook's Mark Zuckerberg

The [Metaverse](#) is the newest [platform](#) being hailed by [transhumanists](#) as ground-breaking because it allows humans to become anything they want in a 3D virtual world. Participants in this virtual environment can possess multiple identities by creating life-like avatars who play games, conduct business, go to concerts and even take virtual trips to Paris, Hawaii or even Mars. The Metaverse is meant to be an extension of real life, as well as the economy. High quality AR (augmented reality) and VR (virtual reality) [headsets/glasses](#) and full body sensors will create an experience that can blur the lines between what's real and what's fake. Transhumanists believe that someday they can become "[mind uploads](#)" into Metaverses.

Cryptocurrency

Cryptocurrency platforms such as [Bitcoin](#) are very appealing to transhumanists because money becomes digitally tied to the user's identity. They consider it easier, quicker and safer when it comes to tracking finances and fraud. In addition, it can be used easily in a virtual environment.

Incidentally, Bitcoin and other cryptocurrencies have been used on the "dark web" for payment for goods and services that banks may not allow. It became mainstream and has had a tumultuous valuation.

Your turn:

As you are praying, write down any promptings or notes you are hearing from the Holy Spirit.

Who is exposing Transhumanism?

There's a small but dedicated group of people exposing the agenda of transhumanism. Pastor Billy Crone has written many [books](#) on the topic and hosts a website called [Get a Life Ministries](#). He ties current trends in technology to Bible prophecy and is a frequent guest on radio shows and [TV programs](#). Leo Hohmann is an investigative reporter who has written for LifeSite, Technocracy News, Zero Hedge, and many others. On his website, [Leo Hohmann.com](#), he reveals the truth about transhumanism. [Patrick Wood](#), an expert on the history of technology and technocracy, authored Technocracy Rising: The Trojan Horse of Global Transformation. His website, [Technocracy.news](#), informs readers about the hidden agendas behind artificial intelligence, and how it's transforming the world.

Pray...

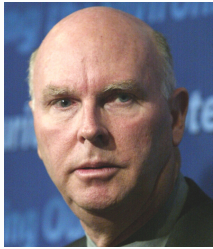

Pray for the transhumanists:

Pray for repentance. [2 Timothy 2:25-26](#)

Pray for them to recognize Jesus as the true Creator, and to acknowledge that their bodies belong to God. [Romans 1:18-23](#), [1 Corinthians 6:19-20](#), [Colossians 1:16](#), [Revelation 4:11](#)

Pray they would use their God-given talents and intellect to work for the Lord, rather than the enemy. [Colossians 3:23-24](#)

Pray for transhumanists to connect to Jesus, rather than the "cloud." [John 14:26](#)

Craig Ventner
Evolutionary geneticist

Ray Kurzweil
Google Engineering Dir.

Elon Musk
Inventor, businessman,
currently the richest man
in history

Klaus Schwab
Founder
World Economic Forum

Pray for those who are exposing transhumanism

Pray their warnings would be heard loud and clear. [Ezekiel 3:16-21](#)

Pray their careers and lives would be supernaturally protected. [Psalm 91:11-13](#)

Pray for these warriors to put on the full armor of God and to receive clear direction from the Holy Spirit regarding the battle plans. [Ephesians 6:10-17](#)
